

Illegal Trading Practices

1. Consistency Rule – your trades must be in accord to consistency of position sizing. This means that no trades should be placed using excessive margin, which can be identified by the firm as resembling “gambling”.
2. High frequency trading is prohibited, which is the opening or closing of positions within at least 15 seconds of each other.
3. Martingale, grid strategies, or any other hedging strategies are prohibited. A trader can open a maximum of two different positions at any given time on the account.
4. Using opposing positions on different challenge or live accounts is prohibited.

Trading Account Rules

1. Trading Accounts have a minimum time until payout of 5 days, and a maximum of 365 days. Upon gains of an account, a trader will need to prove that their gain was not just luck, as placing small trades of less than .05 lots closed quickly will deem the initial profitable trade as sheer “luck”.
2. Copy trading and the use of commercial EAs is not allowed. IP addresses must be consistent, and a foreign address connected to other accounts will be whitelisted.
3. Only listed instruments are allowed to be traded. Trading any other instruments is strictly prohibited and will lead to immediate account termination. The allowed tickers within the account are:

- Crypto (BTCUSD, ETHUSD)
- All major indices (including but not limited to; US500, US100, and US30)
- NO Stocks
- Gold and Oil (Only commodities)
- Forex (Any and all pairs under “Forex”)

Payouts and Other Stipulations

1. Maximum payout per period is 6%.
2. Original payout is 80% split of the gains made on top of the initial balance of the live account. Upon successful payout, splits are increased to 90%.
3. Allow for 3-5 business days to process payout requests.
4. Upon payout, allow for another 3-5 business days to receive credentials for the next phase of the account, for a 90% profit split.
